New to Haida Forest Products!
Please meet Avril Godman. Avril will be taking your phone calls and helping Misty Thompson with the many office duties at Haida.

Pictured above is Derrick Hebert our Head Sawfiler with a new addition to our grinding room, a Simonds Bandsaw Tooth Straightener. This brand new technology will automatically straighten each saw tooth to a tolerance of less than 5 thousandths of an inch.

This machine, along with stellite tipped bandsaws, provides an excellent surface on all our resawn texture bevel sidings and panelings.
This is only the 2nd machine to be installed in BC, and the only machine being used in a remanufacturing plant!

Ron LeMaitre has joined the sales staff at Haida Forest Products. Ron has worked in the plant at Haida for 30 years, most recently as our Head Shipper. Ron is very knowledgeable about our products, and is now available to take your calls at our sales desk along with Gary and Robert.

For the upcoming decking season, consider supplying your customers with 5/4 x 5 Architect Knotty Decking now available from Haida Forest Products. This product is priced less than 5/4 x 6 Architect Knotty Decking and is a very attractive profile. Please call for tallies and pricing information.
